ARTURON grc

We develop.
Compliance.

FOR YOUR OPERATIONS AND YOUR ASSET OWNER CLIENTS

Turn obligations into reliable everyday processes

You operate wind, solar, storage or CHP assets. ARTURON grc brings obligations, responsibilities, actions and evidence together in one shared overview.

Make responsibilities clear

Identify applicable obligations, assign responsibilities and set due dates.

Your result: a structured register of obligations.

Make progress visible

Track inspections, findings and actions. See where decisions are needed.

Your result: a clear basis for managing your operations.

Share evidence with confidence

Organise evidence for each customer and share it through the Trust Center.

Your result: organised records for asset owners and audits.

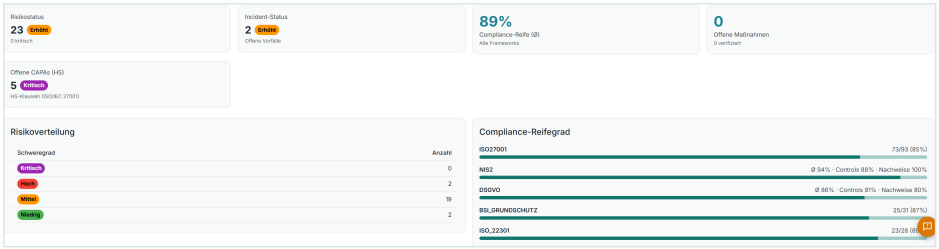

Expand your service offering

Expand your offering with GRC services for asset owner clients, with clearly agreed tasks, regular reports and selectively shared evidence.

Your result: additional billable services and closer customer relationships.

ARTURON grc at a glance

Risks and compliance maturity in one shared view.

Dashboard excerpt · German interface

How we work together

Assess → **Set up** → **Operate**

Establish applicable requirements and agree the scope for each asset owner.

Create customer environments, assign assets and organise actions.

Deliver agreed services, maintain evidence and report results.

Separate customer environments | Selective evidence sharing | Hosted in Germany

ISO/IEC 27001:2022

Data centre, software development and support.
ISMS ISO/IEC 27001 certified since 2017.

IEC 62443-4-1

Certified secure development process at Ritter Technologie GmbH.

Let’s take a look at your portfolio

A one-day preliminary assessment.
With a concrete proposal for your first three customer environments.
